

Children's Privacy Notice

WHAT IS A PRIVACY NOTICE AND WHY DOES IT APPLY TO ME?

A Privacy Notice tells people how organisations use information that they hold about them. A new law called the General Data Protection Regulation 2016, also known as GDPR, says that we need to provide you with this Privacy Notice and let you know:

- What information we hold about you
- How we keep this very important information safe and secure and where we keep it
- How we use your information
- Who we share your information with
- What your rights are
- When the law gives us permission to use your information

WHY DOES THE LAW GIVE YOU PERMISSION TO USE MY INFORMATION?

The law gives us permission to use your information in situations where we need it to take care of you. Because information about your health is very personal, sensitive and private to you, the law is very strict about how we use it.

So, before we can use your information in the ways we have set out in this Privacy Notice, we have to have a good reason in law, which is called a 'lawful basis'. Not only do we have to do that, but we also have to show that your information falls into a special group or category, because it is very sensitive. By doing this the law makes sure we only use your information to look after you and that we do not use it for any other reason.

If you would like more information about this please ask to speak to our Data Protection Officer (DPO) mentioned in this Privacy Notice who will explain this in more detail.
